

# Gulf of Mexico LEAP Program

## *Leading with Equity in Adaptation Practice*

The LEAP Program aims to strengthen community-led climate change adaptation initiatives through partnerships, collaboration, and capacity-building. The LEAP Program will support adaptation projects based on lived experiences of climate impacts in the Gulf of Mexico.

### Program area

Frontline communities in the nine-county region in Texas Upper Gulf Coast.

### Goals

1. Building relationships between community leaders and adaptation professionals
2. Fostering local knowledge base and access to climate adaptation resources
3. Enhancing diversity and enabling equity in adaptation work

### Deliverables and outcomes

**60** Participants recruited for the LEAP Program

Community leaders and climate adaptation professionals work together to design and implement projects

**Hybrid, interactive training on adaptation**

Participants gain new skills, knowledge, and access to regional climate data and adaptation resources

**6** Community-led adaptation projects

All community members benefit from adaptation outcomes of local projects

### Timeline (3 years)
